

Dear Colleagues,

Following the continued interest in the [IEEE Around-the-Clock Around-the-Globe Magnetism Conference](#) (AtC-AtG) by the IEEE Magnetics Society, we are excited to announce that the next edition of the conference will take place in the **last week of September 2023**. With its hallmark virtual format spanning all time zones over the course of 24 hours across the globe, the IEEE AtC-AtG series comprises invited talks from prestigious experts and contributed talks by postdocs and students across all fields of magnetism ([Page 11-12; IEEE Mag Soc newsletter](#)).

We would like to call for enthusiastic postdoctoral researchers and graduate students from around the world, who are interested in **servicing as part of the Organizing Committee** for the IEEE AtC-AtG 2023. Members of the Organizing Committee will be responsible for organizing, planning, and executing the conference from start to finish, with support from the Advisory Board and Steering Committee. This is an excellent opportunity for early career researchers to obtain firsthand experience in organizing an international conference, network with other magnetism experts across the globe and, overall, have some fun.

Those interested in servicing on the Organizing Committee should submit a short application by **00:00 UTC 20 February 2023** by filling [this Jotform](#).

For further information, you may reach out to: [nembach@ieee.org](mailto:nembach@ieee.org).

Please feel free to share this opportunity with anyone who might be interested.

Sincerely,

*The IEEE AtC-AtG Conference Advisory Board Co-Chairs*

May Inn Sim  
Jan Masell  
Alberto de la Torre  
Anna Pasyukova  
Daniela P. Valdés  
Michael Lord

*The IEEE AtC-AtG Conference Steering Committee*
