

THE IEEE NORTH JERSEY SECTION NEWSLETTER

VOL. 69, NO. 08

SEPTEMBER 2023

Message from the IEEE North Jersey Section Chair Prof. Hong Zhao

As the new season of Autumn comes, the IEEE North Jersey Section is heating up with a variety of events tailored to meet the diverse interests and needs of our local members. We are kicking off this month with a series of technical seminars that cover the latest advancements in various fields of engineering and technology including Power and Energy, Clean Energy, Telecommunications, Machine Learning, Artificial Intelligence, and Computer Vision.

We also have our annual event, North Jersey Advanced Communication Symposium scheduled for September.

In addition, we also collaborated with other IEEE sections to have joint events. This will bring together experts from various IEEE sections. Stay tuned for more information and announcements about our joint events. We look forward to seeing you there!

Best wishes,

Hong Zhao, IEEE North Jersey Section Chair

IEEE – IMPORTANT EVENTS, ARTICLES, ANNOUNCEMENTS AND REMINDERS:

Moving Toward Electric Vehicles (EVs)

Are you aware of an incredible IEEE report, premiered in IEEE Spectrum --- "The EV Transition Explained", by Robert Charette, contributing editor of Spectrum. A self-described "risk ecologist", Charette is interested in the intersections of business, political, technological, and societal risks. Charette is an award-winning author of multiple books and numerous articles on the subjects of risk management, project and program management, innovation, and entrepreneurship. A Life Senior Member of the IEEE, Charette was a recipient of the IEEE Computer Society's Golden Core Award in 2008. And his report is a "Must-Read" if you have an interest in the coming EV revolution. Hint: It is much harder than most people are aware of or believe, and likely fraught with some unpleasant surprises. Here are a few "sticks of dynamite" taken directly from the report to think about.

Transitioning to electric vehicles and renewable energy to combat climate change are valid goals in themselves. Drastically reducing our fossil-fuel use is key to realizing those goals. However, attempting to make such transitions at scale in such a short period is fraught with problems, risks, and unanticipated consequences that need honest and open recognition so they can be actively and realistically addressed. Going to scale means not only manufacturing millions of EVs per year but supporting them from recharging to repair. A massive effort will be needed to make this happen.

You do not have to be an IEEE member, but prior registration is encouraged to attend any event. [IEEE North Jersey Section Website](#) [The Section Executive Committee Roster](#)

Shifting a 125-year-old auto industry that's optimized for ICE-vehicle production to EVs using nascent technology is a monumental challenge. Requiring that automakers do so in 15 years or less is even more daunting, although part of it is their own doing by not recognizing earlier that EVs might be a threat to their business models. EVs require automakers and their suppliers to reinvent their supply chains, hire employees with new software, battery, and mechatronic skill sets, and retrain or else lay off workers whose outdated skills are no longer needed.

EVs alone aren't sufficient to meet carbon-reduction targets, which means enormous lifestyle changes for many of us, as we try to do our part to combat climate change. People will need to drive and fly less, walk and bike more, and take public transportation. We'll need to switch to a more plant-based diet and convert household appliances powered by fossil fuels to electricity, to name only a few looming adjustments. People's willingness to accept these changes and their ability to implement them will be crucial to our success at adapting to climate change and mitigating its impacts.

Talk to you again soon...

- **IEEE North Jersey Section Picnic/Membership Development Event**

The IEEE North Jersey Section held its 2023 Summer Picnic and Membership Development Event on August 20, 2023 at Duke Island Park Bridgewater, NJ. The event started at 12:00pm and was graced by the presence of the enthusiastic members of the North Jersey Section, their family members, some invited IEEE dignitaries from the neighboring sections and Region-1, and many students from graduate and undergraduate levels, award recipients from The North Jersey Science Fair and many others, totaling to about 80 people. The attendees were interested in knowing more about the benefits of becoming IEEE members and the event was the perfect setting for membership development, where many long-time members, Senior Members, Life members etc. were actively involved in interacting with the new and interested attendees. Delicious meals, followed by ice-cream, desserts, tea and other refreshments were served. All members went home with a gift token of appreciation for their volunteering efforts year-round. A few pictures of the events are shared below.
