CALL FOR PAPER

SUSTAINABLE FUTURES:

HARMONIZING HUMANITY AND TECHNOLOGY FOR A THRIVING WORLD

Cybernetics (CYB)	Human-Machine Systems (HMS)	Systems Science & Engineering (SSE)
- Agent-Based Modeling - Application of Artificial Intelligence - Artificial Immune Systems - Artificial Life - Biometric Systems and Bioinformatics - Cloud, IoT, and Robotics Integration - Complex Network - Computational Intelligence - Computational Life Science - Cybernetics for Informatics - Deep Learning - Evolutionary Computation - Expert and Knowledge-Based Systems - Fuzzy Systems and their applications - Heuristic Algorithms - Hybrid Models of Neural Networks, Fuzzy Systems, and Evolutionary Computing - Image Processing and Pattern Recognition - Information Assurance and Intelligence - Intelligent Internet Systems - Knowledge Acquisition - Machine Learning - Machine Vision - Media Computing - Medical Informatics - Multimedia Computation - Neural Networks and Their Applications - Optimization and Self-Organization - Approaches - Quantum Cybernetics - Quantum Machine Learning - Representation Learning - Swarm Intelligence - Transfer Learning	- Assistive Technology - Augmented Cognition - Brain-Based Information Communications - Design Methods - Entertainment Engineering - Human Factors - Human Performance Modeling - Human centered Learning - Human-Computer Interaction - Human-Machine Cooperation and Systems - Human-Machine Interface - Information Systems for Design - Information Visualization - Intelligence Interaction - Interactive and Digital Media - Interactive Design Science and Engineering - Kansei (sense/emotion) Engineering - Medical Informatics - Multimedia Systems - Multi-User Interaction - Resilience Engineering - Supervisory Control - Systems Safety and Security - Team Performance and Training Systems - User Interface Design - Virtual and Augmented Reality Systems - Wearable Computing	- Communications - Conflict Resolution - Consumer and Industrial Applications - Control of Uncertain Systems - Cooperative Systems and Control - Decision Support Systems - Discrete Event Systems - Distributed Intelligent Systems - Electric Vehicles and Electric Vehicle Supply Equipment - Enterprise Information Systems - Fault Monitoring and Diagnosis - Homeland Security - Infrastructure Systems and Services - Intelligent Green Production Systems - Intelligent Power Grid - Intelligent Transportation Systems - Large Scale System of Systems - Manufacturing Automation and Systems - Mechatronics - Micro and Nano Systems - Modeling of Autonomous Systems - Quality and Reliability Engineering - Robotic Systems - Service Systems and Organizations - Smart Buildings, Smart Cities, and Infrastructures - Smart Metering - Smart Sensor Networks - Soft Robotics - System Architecture - System Modeling and Control - Technology Assessment - Trust in Autonomous Systems

REGULAR PAPERS

Prospective authors are invited to submit full-length papers electronically through the conference website. Papers (regular length of up to 6 pages) with max. 2 overlength pages (including paper title, authors and affiliations, figures, and references) for an extra fee should be concise but contain sufficient details and references to allow critical review. Papers will be reviewed (single-blinded) by at least two referees for technical merit and content.

SPECIAL SESSIONS PAPERS

Special Sessions provide a focused discussion of new and innovative topics. Special Session proposers should download the special session proposal template and submit the completed proposal to the Special Sessions Chairs. Special Session organizers should collect at least six papers. All submitted special session papers undergo the same review process as regular papers, and submission to proposed sessions is not a guarantee of acceptance. The list of Accepted Special Sessions is [available here](#).

INDUSTRIAL PAPERS

These contributions are intended to promote contributions from industries on technology development, innovations, and implementations, which will facilitate collaboration between industrial and academic members of the SMC community. All submitted industrial papers undergo the same review process as regular papers via submission page.

WORKSHOP AND TUTORIAL PAPERS

These contributions are intended to promote contributions from applied research and applications, including work in progress, and facilitate increased collaboration between industrial and academic members of the SMC community.

BMI WORKSHOP PAPERS

These contributions are intended to promote contributions from BMI, including work in progress, and facilitate the interaction and intellectual exchange between researchers, developers, and consumers of BMI technology.

Submission Guidelines

Authors must adhere to the IEEE conference written paper format (including paper title, authors and affiliations, figures, and references) and they must submit the draft version of the paper for review before the due submission deadlines. These are submitted through the PaperCept submission system (<https://conf.papercept.net/conferences/scripts/start.pl>). IEEE is very strict about the requirements for PDF files for inclusion in the [IEEE Xplore® Digital Library](#). We strongly recommend using the set of templates in MS Word and LaTeX format provided by IEEE. A4 page size should be used. Please use them to create your paper, but don't modify the style or the format under any circumstances.

Submit only original work, not previously published, or copyrighted. Prospective authors are expected to submit only their original works. The conference will be using the CrossCheck automated screening system to help verify the originality of papers. Submitted works may be compared to over 20 million articles in databases worldwide. Papers that violate IEEE's publication principles may be summarily rejected. If the violation is deemed severe, then disciplinary actions may also be taken by IEEE. For further details please have a look at the [Conference Authors @ IEEE Author Center](#).

Accepted and presented papers will be copyrighted to IEEE and published in conference proceedings, which will be eligible for inclusion in the [IEEE Xplore® Digital Library](#), once it meets the requirements of an IEEE quality review.

Deadlines

Submission of Proposals for Special Sessions, Tutorials and Workshops:
February 15, 2024

Acceptance Notification of Special Sessions Proposals, Tutorials and Workshops:
March 4, 2024

Submission of Regular, Special Session, Industrial, BMI Workshop Papers, and Workshop Papers:
April 8, 2024

Acceptance Notification of Regular, Special Session, Industrial and BMI Workshop Papers:
May 30, 2024

Final Camera-ready Submission of Regular, Special Session, Industrial, BMI Workshop and Workshop:
July 15, 2024

Deadline for Early Registration:
July 29, 2024

Deadline for Late Registration:
October 4, 2024
