IEEE Life Members Conference

Evolution: Technology, Applications, and Contributions
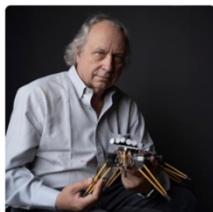

Austin, Texas, USA | 14-16 April 2024

Learning never stops: Join us for a three-day event specially curated for technology influencers, innovators, and pioneers of all ages.

Join us for the inaugural Life Members Conference, coming up quickly on 14-16 April in Austin, Texas at the Hyatt Regency Hotel located in downtown.

The conference is open to all interested technology enthusiasts and focuses on the evolution of technology, innovation, and applications.

The three-day event will feature workshops, mentoring sessions, keynote presentations, technical topics, and company tours. The speakers are experts from industry, academia, and relevant fields.

The conference brings diverse talents and seasoned speakers that include:

Professor Rodney Brooks
Robust AI/iRobot

Karen Panetta
Tufts University

John McDonald
JDM Associates, LLC

Manuela Veloso
*JP Morgan Chase – AI Research*

Brittne Kakulla,
AARP

Kendra Cook
NASA Jet Propulsion Laboratory

Dr. Julie Shah
MIT

Mike Branch
Geotab

Detail of the conference agenda, sessions, and registration are provided on the conference website: https://lifemembersconference.ieee.org

There are still a few sponsorship and exhibit opportunities.

With registration, the conference provides meals and special hotel reduced rate in the heart of downtown Austin. Please register at https://lifemembersconference.ieee.org/registration/

Please take advantage special discount offer for the three-day event:

- **Friends & Family Discount**: Use promo code DISX30 to get US$30 off the cost of each registration. *This discount applies to all registrations (members and guests, if applicable)*.
- **Students Only:** Single-Day Registration by 3/31/2024 @ US$50.00 each day. *Changes to US$100.00 on Sunday, Mar. 31, 2024*.

The conference is a great opportunity to network with Life Members, industry-based luminaries, and technical professionals, learn about new and emerging technologies, and recognize the experience and influence Life Members have on the profession.

Furthermore, attendees can explore the MOVE Community Outreach program, a meaningful IEEE-USA initiative that extends onsite emergency aid to those affected by natural disasters.

For additional information about the conference, please feel free to reach out to
