### Bio: Mark Tell

Mark is the Assistant Manager—Compliance & Field Operations with the Australian Communications & Media Authority ([ACMA](#)). Mark has been working in the radio and telecommunications industry for over thirty years. Fourteen of those were spent internationally in more than twenty countries. He has held senior positions in both State and Federal Government agencies, private sector companies, and internationally with the United Nations.

### Wireless Communications and Safety

- Wireless regulation in Australia. Is it important to me?  
Yes, with ever-increasing wireless environments both industrially and socially it is a growth area and regulation and consequences are very important to all of us.
- How can I protect myself? my company? workplace? Where can I go for help? Mark will give you some answers.
- Learn how to minimise the risk of interference to your operations and improve safety.
- Do you sell radio communications in Australia?  
Find out what you need to know.
- Is potential radio communications interference a business opportunity?  
Learn how you could be offering more services to your customers.
- ACMA offers an interference diagnostic service to radio communications licensees and consumers of domestic television and radio broadcasting services. Find out more.

**Plus** Rob Howes and Kathryn Askwith from the Australian Radio Communications Industry Association ([ARCIA](#)) will give a brief talk on the role of ARCIA and its work with the manufacturers, suppliers and end-users in the Australian radio spectrum. ARCIA is the peak national industry body representing the two-way and associated wireless radio communications industry in Australia. It is a not-for-profit Association which promotes issues such as the protection and better utilisation of the radio communications sections of the spectrum and increasing training levels and expertise of those who are employed in radio communications sector.
